Whether I'm supporting a nearly 100 year old Los Angeles icon, or an 80 year old streamliner ship, giving it the creative visuals needed to help keep it relevant in the public eye is one of the most rewarding projects.

House of the Future & TRON Murals

Quick hand drawn sketch, digitally colored. Storyboard style.

There is nothing I enjoy more than creating concepts and visuals for places I truly care about. This is a collection of art created over the years for Disney. Both proactive passion projects and actual art designed for the Park.

I'm strategic when it comes to doing art for tourism business, in some cases it allows me to do a throwback look. It reminds people that they have an opportunity to break from today and be transported to a different era. My process is to treat it as a classic Disneyland attraction poster, then pull all my branding visuals from that poster for consistency.

A brand new Halloween event at a 135 year old actual haunted house needs the perfect visuals to communicate what kind of new experience is to be had. Honored to help bring UNHINGED to life for what we hope is a new Fall tradition.

Logo & Branding Design.

Reminding visitors that the place to stay for Halloween in Southern California is Buena Park. Logo and web collateral design.
